## Form for evaluating the battery condition

The condition of a battery must be before a transport of expert customers and responsible persons assessed and documented.

The decision on the type of packaging and the return transport or return can only be done after thorough examination of these documents by BMZ GmbH.

BMZ can not assume any liability for any costs or penalties due to independent shipping (without feedback from BMZ about the type of packaging / declaration).

YES	NO	
<input type="checkbox"/>	<input type="checkbox"/>	Housing damaged or significantly deformed
<input type="checkbox"/>	<input type="checkbox"/>	Run out of battery (spots visible from the outside)
<input type="checkbox"/>	<input type="checkbox"/>	Is a strange smell audible? (organic electrolyte, plastic stain)
<input type="checkbox"/>	<input type="checkbox"/>	Does the battery have a temperature change? - measurable temperature increase when switched off (warmer than hand-warm)?
<input type="checkbox"/>	<input type="checkbox"/>	- Tarnish on metals?
<input type="checkbox"/>	<input type="checkbox"/>	- melted or deformed plastic parts (sockets)
<input type="checkbox"/>	<input type="checkbox"/>	If the fault memory of the battery management system reports defective cells, overcurrent overcharging, overdischarge, excessive temperature?
<input type="checkbox"/>	<input type="checkbox"/>	Are there loose parts in the case (when moving) or on the case (loose charge / discharge connector or communication interface?)
<input type="checkbox"/>	<input type="checkbox"/>	Are water damage evident? (Corrosion at charging / discharging socket)
<input type="checkbox"/>	<input type="checkbox"/>	Can the malfunction from the transport to the place of analysis not be diagnosed?
<input type="checkbox"/>	<input type="checkbox"/>	Defective mechanical parts (locking / unlocking)?
<input type="checkbox"/>	<input type="checkbox"/>	no or faulty communication (system to battery without function)
<input type="checkbox"/>	<input type="checkbox"/>	No charging and discharging function
<input type="checkbox"/>	<input type="checkbox"/>	Capacity problem?
<input type="checkbox"/>	<input type="checkbox"/>	Unexplained performance degradation or performance breakdown?

**PICK-UP ONLY IN CONSIDERABLE HAZARD PACKAGING POSSIBLE**
